GENERAL EXCHANGE TARIFF

BUTLER TELEPHONE COMPANY
d/b/a TDS Telecom
Alabama

Section 7
Original Sheet 1

OPTIONAL SERVICES

A. CUSTOM CALLING SERVICES

1. General

Custom Calling Services are optional services offered in addition to regular exchange service to those customers served by central offices arranged to provide such services. The number of Custom Calling Services available depends upon the exchange central office providing the service and is subject to the availability of its facilities.

2. Service Descriptions

a. Call Forwarding

This service redirects incoming calls to another telephone number. The customer can activate this service by dialing a code and entering the number to which calls should be forwarded. When activated, all calls that are forwarded when the line is idle cause a short ring on the forwarded line as a reminder that the service is active. To deactivate Call Forward, a customer must dial a special access code. All calls forwarded are subject to transmission limitations and all applicable local and long distance charges.

b. Call Forward-Busy (Customer Programmable)

This service routes incoming calls to another telephone number when the customer's dedicated number is busy. The customer can activate this service by dialing a code and entering the number to which calls should be forwarded. To deactivate Call Forward - Busy, a customer must dial a special access code. All calls forwarded with this service are subject to transmission limitations and all applicable local and long distance charges.

c. Call Forward-No Answer (Customer Programmable)

This service redirects incoming calls not answered after a predetermined number of rings to another telephone number. The number of rings is determined and set by the Company. The customer can activate this service by dialing a code and entering the number to which calls should be forwarded. To deactivate Call Forward - No Answer, a customer must dial a special access code. All calls forwarded are subject to transmission limitations and all applicable local and long distance charges.

BUTLER TELEPHONE COMPANY
d/b/a TDS Telecom
Alabama

Section 7
Original Sheet 2

OPTIONAL SERVICES

A. CUSTOM CALLING SERVICES (Continued)

2. Service Descriptions (Continued)

d. Call Forwarding-Remote Access

This service allows the customer to activate and deactivate Call Forwarding from a telephone in another location. All calls forwarded are subject to transmission limitations and all applicable local and long distance charges.

e. Call Hold

This service allows a customer to place a current caller on hold, which frees the line so the customer can initiate another call. To activate Call Hold, the customer depresses the switchhook to receive a dial tone and then dials a specific code. Only one call per access line can be placed on hold at a time. The held call cannot be added to another call, however, the customer can toggle between each call.

f. 3-Way Calling

This service allows a customer to add a third party to an existing telephone call. To add a third party, the customer depresses the switchhook once to place the current party on hold, receives a dial tone, dials the third party's number, and then depresses the switchhook again to establish the three-way connection. All 3-way calls are subject to transmission limitations and all applicable local and long distance charges.

This service is available on a flat monthly rate and a pay-per-use basis. Pay-per-use 3-Way Calling will have a per activation rate and a monthly price cap. After the monthly price cap has been reached, each activation thereafter will be at no charge.

GENERAL EXCHANGE TARIFF

BUTLER TELEPHONE COMPANY
d//b/a TDS Telecom
Alabama

Section 7
Original Sheet 3

OPTIONAL SERVICES

A. **CUSTOM CALLING SERVICES** (Continued)

2. Service Descriptions (Continued)

g. 6-Way Calling

This service allows a customer to call up to five parties and establish a six-way conference call. To activate this service, the customer dials an access code, dials the desired telephone number (calling party must answer), depresses the switchhook to add the calling party to the line, then depresses the switchhook again to receive a new dial tone. If the called party line is busy or there is no answer, the customer must dial a special access code to drop the line. This process needs to be repeated until all parties (up to five) have been connected to the customer's line. All 6-Way Calls are subject to transmission limitations and all applicable local and long distance charges.

h. Call Transfer

This service allows the customer to hold and transfer incoming, out-going and intragroup calls. If the customer has established a three way call, this service will allow the customer to hang up while the other two parties remain connected. Any applicable long distance charges will apply for the duration of the call, even if the customer drops off the call.

i. Call Waiting/Cancel Call Waiting

This service alerts a customer who is on the phone that another local or long distance caller wants to get through the line. The customer will receive a tone signal to indicate another incoming call and the caller will receive the usual ringing tone. To place the first call on hold and answer the incoming call, the customer depresses the switchhook once. The customer can then toggle between both calls by depressing the switchhook. If the customer hangs up when a call is still on hold, the customer's line will automatically ring back.

Cancel Call Waiting allows a Call Waiting customer to deactivate the Call Waiting service by dialing a code. When this service is activated, the customer will not be interrupted by the Call Waiting tone and the incoming caller will receive a busy signal. Call Waiting will remain disabled for the rest of the call, but will be automatically restored upon call termination.

GENERAL EXCHANGE TARIFF

BUTLER TELEPHONE COMPANY
d/b/a TDS Telecom
Alabama

Section 7
Original Sheet 4

OPTIONAL SERVICES

A. **CUSTOM CALLING SERVICES** (Continued)

2. **Service Descriptions** (Continued)

j. Long Distance Call Waiting

This service uses a special tone signal to indicate to the customer that the incoming call is long distance. The tone is different than the Call Waiting tone signal received for a local call. The long distance caller will receive the usual ringing tone.

k. Home Intercom-Basic

This service allows customers to redial their own directory number in order to talk to another party at a different extension. To activate this service, customers redial their own directory number and then hang-up. After a short interval, the phone will ring back. Once both parties pick-up the phone, they will be able to have a two-way conversation. This service is also known as Revertive Ringing.

l. Home Intercom-Enhanced

This service allows customers to establish a talking path between two or more of their extensions. To activate this service, the customer dials one of the access code numbers predetermined by the Company, receives an announcement, and then hangs up the phone. The phone will ring back in one of the distinctive patterns, depending on the access code dialed. Also included in this package is dialable hold, where one extension can transfer an outside call to another extension

m. Warm Line

This service allows a call to be automatically placed to a pre-assigned number determined by the customer. The call will be placed once the customer's phone has been off-hook for a predetermined time-out period. The time-out period may be set at 1 to 14 seconds. During the time-out period the customer will receive a normal dial tone and can originate calls. Once the time-out period has expired, a call is automatically placed to the pre-assigned number as programmed by the Company.

GENERAL EXCHANGE TARIFF

BUTLER TELEPHONE COMPANY
d/b/a TDS Telecom
Alabama

Section 7
Original Sheet 5

OPTIONAL SERVICES

A. **CUSTOM CALLING SERVICES** (Continued)

2. Service Descriptions (Continued)

n. Hotline

This service allows a call to be automatically placed to a pre-assigned number determined by the customer as soon as the subscriber's phone goes off-hook. The Company will program the pre-assigned number line for the customer.

o. Personal Ringing

This service allows the customer to have up to four distinct telephone numbers on a single line. The second, third and fourth number will each have a distinctive ringing pattern so the customer can identify which number has been called. If a customer also subscribes to Call Waiting, each phone number will have a distinctive Call Waiting tone. If a customer also subscribes to Call Forward, the main directory number or all four telephone numbers can be forwarded.

p. Speed Call 8

This service allows the subscriber to keep a list of eight specified telephone numbers which can be dialed by using a one-digit (2 through 9) access code.

q. Speed Call 30

This service allows the subscriber to keep a list of 30 specified telephone numbers which can be dialed by using a two-digit (20 through 49) access code.

r. Toll Restriction

This service enables customers to restrict all or a combination of 0+ and 1+ toll calls from being placed over their exchange lines/trunks. When a restricted call is attempted from a line/trunk equipped with this service, a dial tone or Company recorded announcement will be heard by the caller.

GENERAL EXCHANGE TARIFF

BUTLER TELEPHONE COMPANY
d/b/a TDS Telecom
Alabama

Section 7
Original Sheet 6

OPTIONAL SERVICES

A. **CUSTOM CALLING SERVICES** (Continued)

2. **Service Descriptions** (Continued)

s. Toll Restriction with PIN Override

This service enables customers to restrict all or a combination of 0+ and 1+ toll calls from being placed over their exchange lines/trunks. In addition, the customer will have the ability to override the restriction on a per call basis by using a Personal Identification Number (PIN). To activate the override, the customer dials a code, the PIN, waits for a dial tone and then dials the toll number. When a restricted call is attempted without the PIN, from a line/trunk equipped with this service, a dial tone or Company recorded announcement will be heard by the caller.

3. **Limitations**

- a. Custom Calling Services require special central office equipment and will be provided only where facilities are available.
- b. Custom Calling Service is only available on single-line party service.
- c. Custom Calling Service will not be provided in connection with Private Branch Exchange Trunk Line Service.

Section 7
Original Sheet 9

OPTIONAL SERVICES

B. ADVANCED CALLING SERVICES

1. General

Advanced Calling Services (ACS) are optional services, offered in addition to regular exchange service, which allow customers to efficiently manage the call flow generated over their Exchange Access Line(s). Customers will be able to screen, redirect, or return selected calls. These services offer subscribers convenience, time savings, and a greater degree of control over the use of their telephones. Advanced Calling Services are available to residence and business customers where facilities are available. Individual feature availability may differ by exchange.

2. Service Descriptions

a. Anonymous Call Rejection

This service enables a subscriber to reject incoming calls from which a privacy indicator is received. The service is activated by dialing a unique code. When the service is active, the Company will not complete calls to its customer when the calling party has activated Caller ID blocking services. Such calls will be routed to a Company recorded announcement. Anonymous Call Rejection is included with Caller ID at no charge.

b. Call Rejection

This service enables a subscriber to reject up to a maximum of six (6) preselected incoming telephone numbers from which he/she does not wish to receive calls. To select a telephone number, the subscriber dials a unique code and then constructs or modifies a telephone number screening list. To add an unknown telephone number to the list, a subscriber can activate a code immediately after receiving an unwanted incoming call. The Company's equipment will screen incoming calls against the subscriber's list and reject those on the list. Callers whose numbers are rejected are directed to a Company recorded announcement. If facilities are unavailable to provide incoming call screening via the subscriber's list, standard call completion will occur.

Section 7
Original Sheet 10

OPTIONAL SERVICES

B. ADVANCED CALLING SERVICES (Continued)

2. Service Descriptions (Continued)

c. Call Return

This service enables the subscriber to automatically redial the telephone number of the most recent incoming call. The Company's equipment will make repeated attempts to establish the call for approximately a thirty (30) minute period, beginning with the subscriber's activation of Call Return if the most recent incoming call is busy. If the most recent incoming call is blocked, the subscriber will get a Company recorded announcement indicating the number is a private number and the call can not be returned. The service cannot be activated for calls originating from a line that is forwarded or from a line not associated with a telephone number, e.g., multiline hunting groups.

Call Return is available on a per usage or flat rate basis. This service will have a per activation rate and a specified number of chargeable activations. After the specified number of chargeable activations, each activation thereafter will be at no charge.

d. Preferred Call Forwarding

This service enables the subscriber to forward up to a maximum of six (6) preselected incoming telephone numbers to another telephone number. To forward a telephone number, the subscriber dials an activation code and then constructs or modifies a telephone number screening list. The Company's equipment will screen incoming calls against the subscriber's list and forward only those telephone numbers on the list. Calls forwarded by this service are subject to all applicable local and long distance charges. These calls are also subject to transmission limitations.

e. Priority Ringing

This service allows the subscriber to provide up to a maximum of six (6) preselected incoming telephone numbers with a distinctive alerting signal or ring (or a distinctive Call Waiting tone if the subscriber has subscribed to Call Waiting), when the subscriber receives calls from them. To program a telephone number, the subscriber dials a unique code and then constructs or modifies a telephone number screening list. The Company's equipment will screen incoming calls against the subscriber's list and provide the Priority Ringing service for the preselected telephone numbers on the subscriber's list.

OPTIONAL SERVICES

B. ADVANCED CALLING SERVICES (Continued)

2. Service Descriptions (Continued)

f. Repeat Dialing

This service enables the subscriber to automatically redial the last outgoing telephone number dialed from that line. When the recalled telephone number is busy, the Company's equipment will make repeated attempts to establish the call for approximately a thirty (30) minute period, beginning with the subscriber's activation.

Repeat Dialing is available on a per usage or flat rate basis. This service will have a per activation rate and a specified number of chargeable activations. After the specified number of chargeable activations, each activation thereafter will be at no charge.

g. Special Call Acceptance

This service enables a subscriber to allow up to a maximum of six (6) preselected incoming telephone numbers to be accepted. To select a telephone number to be accepted, the subscriber dials a unique code and then constructs or modifies a telephone number screening list. The Company's equipment will screen incoming calls against the subscriber's list and allow only those calls to be completed. Calls from all other numbers will be routed to a Company recorded announcement.

h. Caller ID

Caller ID - Basic (Number only) and Caller ID-Deluxe (Name and Number) are the available services.

1) Caller ID – Basic

This service utilizes specific network capabilities to transmit and display the number associated with an incoming call to the called party's access line. The number of the incoming call is transmitted during the silent interval between the first and second ring of the called party's line. Caller ID subscribers must provide, and connect, their own compatible premises equipment in order to process and display the number transmission. The Company will forward all telephone numbers where technically feasible.

2. Service Descriptions (Continued)

h. Caller ID (Continued)

1) Caller ID - Basic (Continued)

If a calling party has activated blocking, the number will not be transmitted to the display equipment of a Caller ID subscriber. Instead, the Caller ID subscriber will receive a privacy indicator. This privacy indicator notifies the Caller ID subscriber that the calling party chose to block number delivery. Anonymous Call Rejection is included with Caller ID at no charge.

2) Caller ID – Deluxe

This service utilizes specific network capabilities, where technically feasible, to transmit the Name and Number associated with an incoming call to the called party's access line. The name and number of the incoming call is transmitted during the silent interval between the first and second ring of the called party's line. Caller ID - Deluxe subscribers must provide, and connect, their own compatible premises equipment in order to process the name and number transmission. The Company will forward all telephone numbers and names where technically feasible.

If a calling party has activated blocking, the name and number will not be transmitted to the display equipment of a Caller ID - Deluxe subscriber. Instead, the Caller ID - Deluxe subscriber will receive a privacy indicator. This privacy indicator notifies the Caller ID - Deluxe subscriber that the calling party chose to block name and number delivery. Anonymous Call Rejection is included with Caller ID at no charge.

OPTIONAL SERVICES

B. ADVANCED CALLING SERVICES (Continued)

2. Service Descriptions (Continued)

i. Caller ID Blocking

Caller ID Blocking allows the caller to prevent the delivery of his/her calling data to a Caller ID subscriber on a per call basis (Caller ID Blocking - Per Call) or per line basis (Caller ID Blocking - Per Line).

1) Caller ID Blocking - Per Call

This service will block the delivery of the caller's data to a Caller ID subscriber for one call only and may be activated from all single party access lines by dialing *67 (1167 from a rotary phone) prior to placing the call. CALLER ID BLOCKING - PER CALL IS PROVIDED TO ALL CUSTOMERS AT NO CHARGE.

Per call blocking will be provided on calls originating from public, semi-public or other paystations used by the general public and party lines.

2) Caller ID Blocking - Per Line

This service will automatically block the delivery of the caller's data to a Caller ID subscriber on all calls and will be made available or offered, at no charge, to law enforcement agencies and domestic violence programs. Per line blocking can be deactivated by dialing *82 (1182 from a rotary phone) prior to placing the call.

OPTIONAL SERVICES

B. ADVANCED CALLING SERVICES (Continued)

B. Service Descriptions (Continued)

j. Call Trace

This service enables the customer to initiate a trace of the last incoming call completed by dialing an activation code immediately after terminating the call. A Call Trace is considered successful when the Company's equipment is able to record the incoming call detail (not the conversation). Incoming call detail includes: the calling number, the time the trace was activated, and in some locations, the time the traced call was received. The results of the trace are never provided to the customer directly. Call Trace information will only be given to appropriate law enforcement agencies. For further action to be taken, the customer is required to contact the Telephone Company Business Office during normal business hours, which will refer the customer to appropriate law enforcement agencies, or contact the law enforcement agency directly. Call Trace detail will be retained by the company and made available to the local law enforcement for ten business days after the trace has been initiated.

Call Trace may not capture incoming telephone numbers marked "private" or "out of area".

Only calls from locations with compatible signaling services are traceable using Call Trace.

Call Trace is available on a flat monthly rate basis and a pay-per-use basis. Pay-per-use Call Trace will have a per activation rate and a monthly price cap. After the monthly price cap has been reached, each activation thereafter will be at no charge. The customer will be assessed the Call Trace fee on the customer's next bill upon completion of a successful trace.

3. Special Conditions and Limitations

a) Special Conditions for Caller ID:

- 1) An originating caller's data may not be displayed to the called party under the following conditions:
 - The caller's data will not be displayed if the called party is off-hook. The called party must be on-hook to receive the caller's data.
 - The caller's data will not be displayed if the called party answers the incoming call during the first ring interval.
 - Caller ID services cannot be provided with any distinctive ringing lines having a maximum silent interval duration that is not long enough to allow transmission of the data message.
 - Identification of names, specific stations or extensions served by a PBX or Key System is not possible. The main directory number or name and number (if available) of the PBX or Key System will be displayed.
 - Caller ID services cannot be provided if the calling party is from a multi-party line. The called party will receive an "Unavailable" display.
 - The caller's data will be unavailable if it is from another office that is not linked by appropriate facilities with the called party's office.
 - The calling party has activated blocking.
 - Caller ID services do not display a directory number or name and number (if available) for operator assisted calls, calls marked private by the originator or calls originating from pay and party line stations.

3. Special Conditions and Limitations (Continued)

a) Special Conditions for Caller ID: (Continued)

2) The following special conditions apply to Caller ID services based on the FCC Caller ID Order effective 12/1/95:

- If a customer dials a "1-800" or other Automatic Number Identification (ANI) Service number, the telephone number that they are calling from will be revealed to the called party through ANI technology. Even if the customer has per line blocking or has activated per call blocking, the 800 number party has the right to obtain this information through ANI.
- ANI information may not be reused or resold for other purposes without a caller's consent, even where the called party has paid for the call.
- Caller ID services are available on all long distance calls where technically feasible.
- All calling data will be displayed to E911 through ANI technology, even if the customer has per line blocking or has activated per call blocking.
- All calling data will be passed, even for customers who do not subscribe to Caller ID.
- Per Call Blocking will be available to all customers.

OPTIONAL SERVICES

B. ADVANCED CALLING SERVICES (Continued)

3. Special Conditions and Limitations (Continued)

b) Limitations of Advanced Calling Services:

The management of these services is possible only:

- Where the calling party's data can be forwarded from the central office originating the call to the terminating central office serving the called party;
- When both the originating customer and the call terminating customer are served from the same central office;
- When both the call originating customer and the call terminating customer are served from different central offices equipped for ACS and are linked by appropriate facilities;
- If offering Caller ID - Deluxe, the Calling Name will be displayed only where appropriate facilities are available to provide a match of Calling Name to Calling Number.

The Company shall not be liable for any loss or damages arising out of error, interruptions, defects, failures, or malfunctions of ACS Services or equipment. Such damages of services after the Company has been notified, and has had reasonable time for repair, shall in no event exceed an amount equivalent to the rates charged for the service affected from the time the customer gives notice until service is restored.

It shall be the responsibility of the customer to provide customer premise equipment (CPE) compatible with ACS.
