SPECIAL CONDITIONS

1. The above rates for private lines, circuits, or channels are applicable when used in connection with local or interexchange intraLATA private line telephone service, program transmission, sound recording, loud-speaker, speech network, and signaling services. The rates apply to each physical, nonphysical, metallic, or grounded circuit or channel.
2. Channels when reasonably available are furnished suitable for specified purposes and are arranged in such manner as the Utility may elect. A channel, circuit, or facility furnished at the above rates may be used only for the specific purpose primarily intended, and may not be used for a combination of services, nor may a service be superimposed on one of a different kind.
3. Where unusual conditions are encountered in arranging for the service, such as loading, balancing, or special arrangements, additional charges may be applied, based on the costs thereof, subsequent to review thereof by the Public Utilities Commission of the State of California.
4. Private lines located wholly within an exchange area may not be connected on a switchboard or connected for exchange or toll service.
5. The minimum charge for intraLATA private line or leased line service is one month's charges determined in accordance with the above rates.
6. The airline measurement used in this schedule is the airline distance between the stations or terminals of the private line, leased line, or channel. The number of quarter miles is computed separately between the various stations or terminals along the route of the circuit, each fractional quarter mile being considered as a whole quarter mile. The number of sections between stations or terminals will be one less than the total number of stations or terminals connected.
