Schedule No. A-21

FIRE REPORTING SYSTEM
(Continued)

SPECIAL CONDITIONS

1. A fire reporting telephone system will be furnished under the provisions of this tariff to a fire protection district, a municipality, or other governmental agencies for use in transmitting reports of fires, other public emergencies, and for the operation of public alarm signals.
2. The utility's liability to the customer for this service, or to any member of the public, or to any third party for any failure of the system, or any delay, interruptions, confusion or mistake in transmission of any message or signal or any consequence for the use, misuse, or failure of the system or service shall be limited to an allowance for interruptions or failure of service as specified in the Rules of this tariff. In no event will the utility be liable to the customer, or any member of the public or any governmental body for any consequential damage arising from any of the foregoing.
3. Where a special type of fire reporting system or facilities are furnished for a customer which are not specifically covered by this schedule the utility may require a special agreement to be signed by the customer. This agreement will cover the special conditions related to the service, if any, its methods of operation and liability clauses to protect the utility to the extent limiting its financial responsibility to the total charges applicable to the service and/or facilities provided.
4. Arrangements to signal firemen's telephones must be compatible with the ringing characteristics of the fire reporting system and the serving central office.
5. Each fireman is required to subscribe to either business or residence one-party network access line service which will be terminated on special fire alarm telephone sets. This access line will be independently billed to each volunteer fireman.
6. A siren control relay will be installed by the utility. All other wiring necessary for the operation of the siren will be provided by the fire department.
