2. Interexchange Service – (Continued)

- a. Winterhaven Telephone Company assents to, adopts, and concurs in the tariffs of Pacific Bell listed below, together with amendments thereto and successive issues thereof, and hereby makes itself a party thereto until this authority is revoked by cancellation of this adoption notice, for the purpose of furnishing all intrastate leased line and private line telephone service originated at or terminated at points of this Utility or its points and points reached over the facilities of connecting utilities.

SCHEDULE CAL. P.U.C. NO. 175-T

Access Service*

Section 7 Special Access
Service for rates and
conditions.

SPECIAL CONDITIONS

1. The above rates for private lines, circuits, or channels are applicable when used in connection with local or interexchange intraLATA private line telephone service, program transmission, sound recording, loudspeaker, speech network, and signaling services. The rates apply to each physical, nonphysical, metallic, or grounded circuit or channel.
2. Channels when reasonable available are furnished suitable for specified purposes and are arranged in such manner as the Utility may elect. A channel, circuit, or facility furnished at the above rates may be used only for the specific purpose primarily intended, and may not be used for a combination of services, nor may a service be superimposed on one of a different kind.
3. Where unusual conditions are encountered in arranging for the service, such as loading, balancing, or special arrangements, additional charges may be applied, based on the costs thereof, subsequent to review thereof by the Public Utilities Commission of the State of California.

* See Schedule No. A-29 for the discounts for qualifying entities.

Schedule No. A-5

INTRALATA LEASED LINE AND PRIVATE LINE TELEPHONE SERVICE
(Continued)

SPECIAL CONDITIONS - (Continued)

4. Private lines located wholly within the exchange area may not be connected on a switchboard or connected for exchange or toll service.
5. The minimum charge for intraLATA private line or leased line service is one month's charges determined in accordance with the above rates.
6. The airline measurement used in this schedule is the airline distance between the stations or terminals of the private line, leased line, or channel. The number of quarter miles is computed separately between the various stations or terminals along the route of the circuit, each fractional quarter mile being considered as a whole quarter mile. The number of sections between stations or terminals will be one less than the total number of stations or terminals connected.
7. For Contributions in Aid of Construction for special construction that have been made taxable to the Utility by the Tax Reform Act of 1986, the Utility will bill an additional fee that has resulted from the taxable income for payments that aid in our cost of construction, other contributions, and the fair market value of contributions received in aid of construction, and the prior nonrecurring rates that will remain in effect.

The Utility will use Method 2 as described in Decision No. 87-09-026. The Utility's Federal Income Tax and California Corporate Franchise Tax rates for the year of the contribution will apply. The contribution is grossed up for the full amount of the taxes and billed to the contributor.

All collections in excess of the gross-up collected is subject to refund with interest computed at the average three month commercial paper rate.

SPECIAL CONDITIONS - (Continued)

8. Type 3002 Description:

- a. Half duplex allows communication between terminals, one direction at a time.
- b. Series 3002 Channel enables computers on data terminals at different locations to communicate with one another over a dedicated analog circuit. Since the services use an analog line, it can also handle voice transmission.
- c. The Series 3002 Channel uses a bandwidth of 300 to 3000 Hz. It is also available with special channel conditioning for improved transmission response levels.
