VOICE MAIL SERVICE

APPROVED

A. GENERAL

Voice Mail Service (VMS) is a central office based service which provides customers with the capability to receive, send, store, and retrieve voice messages over the telephone network.

VMS answers incoming calls placed to the customer's telephone line, when the called number is busy and/or if the called number does not answer. The service will greet incoming callers with a personal or a company-provided greeting. It then receives and saves the caller's messages for review by the customer. Customers can retrieve messages left for them from any touchtone telephone.

B. SERVICE DESCRIPTIONS

1. GENERAL

Voice Mailbox - Incoming calls to existing telephone lines are forwarded to a "mailbox" in the VMS equipment when the line is busy and/or when the call is not answered after a company-defined number of rings (4). Callers are asked to leave a message in the mailbox. Voice Mail can greet callers with a personal or company-provided greeting and the mailbox receives and saves the caller's message for review by the customer. The Voice Mail customer can thereafter access the mailbox at any time to retrieve stored messages using suitable customer premise equipment (CPE) from any location connected to the telephone network. After listening to each message, the customer has the option to erase or retain the message for future reference.

Where available, whenever there is a message stored in the mailbox, the customer receives a message waiting indication via a Stutter Dial Tone or Message Lamp Indication. The indicator will continue until the customer has retrieved the message.
