GENERAL EXCHANGE TARIFF

CAMDEN TELEPHONE COMPANY
Georgia

Section T
Fifth Revised Sheet 1
Cancels Fourth Revised Sheet 1

PRIVATE LINE SERVICE

APPROVED

A. CONCURRENCE

Camden Telephone Company concurs in the Private Line Service and Channels Price List for Bell South Telecommunications, Inc., together with amendments and successive issues, for the purpose of providing private line services and channels between the Company's serving area and other areas within the Georgia intrastate intraLATA jurisdiction. The concurrence is limited to speeds up to and including an OC3. Speeds higher than an OC3 will be handled on an Individual Case Basis.

B. EXCEPTIONS

1. Customer provided terminal equipment on customer provided communication systems attached or connected to the facilities of the concurring utility and permitted to be used under this tariff, may not be used for local exchange service of this concurring utility, unless there is compliance with provisions of the tariff of this concurring utility.¹
2. Camden Telephone and Telegraph Company, Inc. concurrence with the issuing utility is limited to private line circuits, that connect with the issuing utility or other connecting companies.¹
3. When private line circuits are provided solely on the facilities of Camden Telephone and Telegraph Company, Inc., the charges specified in paragraph C will apply. These charges are based on a single pair of wire. In cases where one circuit requires multiple pairs, the charges in paragraph C will apply to each pair of wires used in the circuit.¹
4. Camden Telephone and Telegraph Company, Inc. will also charge a termination fee at the rate specified in paragraph C. A termination is defined as each premise appearance of the cable pair. Where multiple pairs are provided to provide one circuit, a termination charge will be applied to each premise appearance of each pair of wire.¹
5. Dedicated DS1 Service - located in this Section.
6. Digital Transport Service - located in this Section.
7. Services not available at all locations

(C)

¹ As of July 12, 2000, exceptions 1 through 4 will no longer be applicable. The exceptions listed above will only apply to customers who subscribed to the services mentioned in the exceptions prior to this date.

PRIVATE LINE SERVICE

APPROVED (T)

C. MONTHLY CHARGES¹

1. Each pair will be charged at the rate of \$3.25 for the first quarter mile, and \$1.25 for each quarter mile or fraction of a quarter mile thereafter. The measurement of the distance will be made in route mileage. (T)
2. Each termination of each pair will be charged at the rate of \$3.50 per termination. (T)

D. DEFINITIONS AND LIMITATIONS OF SERVICE¹

1. A private line circuit is defined as a pair or pairs of wires provided by the Company, for the private use of its customers. These circuits function without connection to local exchange switching equipment of the Company. (T)
2. Examples of circuits used for this purpose and provided by the Company are: (T)
 - a. Circuits used for the transmission of data information.
 - b. Circuits used by banks and others for alarm purposes.
 - c. Circuits used for voice transmission between two or more points, which functions separate from local exchange equipment.
 - d. Circuits provided as a vehicle to transmit radio signals (e.g., to connect city and county police and fire radios)
 - e. Circuits used to monitor power company substations or water company pump stations. (T)

¹ As of July 12, 2000, the services mentioned on this sheet will no longer be available. The rates, definitions, and limitations will only apply to customers who subscribed to these services prior to this date.

PRIVATE LINE SERVICE

APPROVED

E. DiSi-1 (As of July 12, 2000, this service is grandfathered, see sheet 10)

1. General

(T)

- A. DiSi-1 service is furnished for Private Line IntraLATA Communications by the Company.
- B. DiSi-1 service is a service for the transmission of digital signals only and uses only digital transmission facilities.
- C. DiSi-1 service provides for the simultaneous two-way transmission of isochronous digital signals at DS1 speeds of 1.544 mbps, where facilities are available.
- D. To ensure satisfactory operation, the terminal equipment provided by the customer must be compatible with the DS1/1.544 Mbps channel facility provided by the Company. The technical specifications and standard network interfaces for DiSi-1 service are contained in BellSouth Services Technical Reference Publication 73525. This publication is available from BellSouth Services Documentation Operations, North W5A1, 3535 Colonnade Parkway, Birmingham, Alabama 35243.
- E. Unless specified following, the regulations for DiSi-1 service specified herein apply in addition to the regulations set forth preceding.
- F. The rates specified for DiSi-1 service following, contemplate the provision of a digital quality facility over existing interoffice carrier equipment and/or exchange cable facilities compatible with this service. If such equipment, new facilities or changes to existing facilities are required for the provision of this service, a special construction charge based on the cost incurred to make the changes will apply in addition to the rates for DiSi-1 service.

2. Regulations

(T)

A. Description of Service

- 1. DiSi-1 service is furnished for the simultaneous two-way transmission of serial, Bipolar Return-to-Zero (BPRZ) isochronous digital signals, except where intentional bipolar violations are introduced by Bipolar with 8 Zero Substitution (B8ZS) format, at a speed of DS1/1.544 Mbps between two-points located within a LATA.
- 2. Multipoint service is not available.
- 3. DiSi-1 service is available on a month-to-month basis or under variable rate periods, with rates based on lengths of 36 months.

E. DiSi-1 (Continued)

(T)

2. Regulations (Continued)

(T)

A. Description of Service (Continued)

4. Connection of DS1/1.544 Mbps communications systems provided by others may be made on a permissive basis, the Company does not represent its DiSi-1 service as adapted for such connections, and shall not be responsible for the through transmission of signals, or the quality of such transmission on such connections.
5. A Channel Service Unit (CSU) or appropriate Termination Equipment (TE) provided by the customer is required at a customer's or authorized user's premises to perform such functions as:
 - proper termination of the service
 - amplification
 - signal shaping
 - remote loop-back
6. The design, maintenance and operation of DiSi-1 service contemplates communications originating and terminating as (1) a customer premises to customer premises channel via the Company's Serving Wire Center, (SWC) - and/or through remote SWCs; (2) a customer premises to the Serving Wire Center - and/or to remote SWCs - partial channel (link); or (3) a central office to central office (interoffice) partial channel (link).
7. DiSi-1 service may also be furnished on a link (partial channel) basis when connected to Centrex service.
8. All appropriate rates specified in other tariff sections are in addition to the monthly rate per package or single channel for DiSi-1 service specified in this Tariff.

B. Definitions

CHANNEL SERVICE UNIT

The term "Channel Service Unit" (CSU) denotes equipment provided by the Customer to terminate a digital facility on the customer's or user's premises.

ISSUED: June 12, 2000

EFFECTIVE: July 12, 2000

BY: Paul E. Pederson, Vice-President

PRIVATE LINE SERVICE

APPROVED

E. DiSi-1 (Continued)

(T)

2. Regulations (Continued)

(T)

B. Definitions (Continued)

DS1

This denotes a channel service expressed in terms of its digitally encoded bit rate in accordance with the North American hierarchy of digital levels. It has a 1.544 Mbps transmission data rate, and provides for the two-way simultaneous transmission of isochronous timed, Bipolar Return-to-Zero (BPRZ) bit stream format except where intentional bipolar violations are introduced by Bipolar 8 Zero Substitution (B8ZS) format. Unframed signal formats are not permitted or compatible with Company equipment. The required format and interface specifications are contained in BellSouth Services References Publication 73525.

DIGITAL LOCAL CHANNEL

The term "Digital Local Channel" denotes a path for DiSi-1 service furnished from the demarcation point on a customer's premises to their Service Wire Center.

INTEROFFICE CHANNEL

The term "Interoffice Channel" denotes a path (or paths) for digital transmission between Company Service Wire Centers within a LATA. An interoffice channel may be furnished in such a manner as the Company may elect.

C. Application of Rates

1. DiSi-1 service is available on a month-to-month basis or under a variable rate period, with rates based on lengths of 36 months. Contract rates increases are subject to the stipulations of 2. following.
2. DiSi-1 service rates under contract will not be increased by Company initiative until the contract period expires. Rates in effect at the time the service is installed and/or as of the service order application date, will be applicable until the contract expires. At the expiration date of the customer's payment period option, the customer may select a new payment period option at current rates or revert to current rates on a month-to-month basis.
3. A Termination Liability Charge is applicable at the date of termination. The applicable charge is dependent on the contract period subscribed to and will be equal to the number of months remaining in the contract times the monthly rate provided under the contract. However, Termination Liability charges will not apply for customer requests for moves of service under CSPP subject to the provisions set forth preceding.

D. Connections

1. Customer-Provided Terminal Equipment, Customer-Provided Derivation Equipment and Customer-Provided Communications Systems may be connected to DiSi-1 service when such connection is made in accordance with the provision specified in 2., 3., and 4. following.
2. Responsibility of the Company
 - a. The responsibility of the Company shall be limited to the furnishing and maintenance of DiSi-1 service to a network interface on the customer's premises where provision is made for the connection of local service.
 - b. The Company shall not be responsible for installation, operation, or maintenance of any terminal equipment or communications systems provided by a customer. DiSi-1 service is not represented as adapted for the use of such equipment or system. Where such equipment or system is connected to Company facilities the responsibility of the Company shall be limited to the furnishing of facilities suitable for DiSi-1 service and to the maintenance and operation in a manner proper for such digital service. The Company shall not be responsible for:
 - the through transmission of signals generated by such equipment or system, or for the quality of, or defects in, such transmission or
 - the reception of signals by such equipment or systems, or
 - damage to terminal equipment or communications systems provided by a customer or authorized user due to testing.
 - c. The Company shall not be responsible to the customer if changes in any of the facilities, operations or procedures of the Company utilized in the provision of DiSi-1 service render any facilities or equipment provided by a customer obsolete, or require modifications or alteration of such equipment or systems or otherwise affects its use or performance.
 - d. The Company undertakes to maintain and repair the facilities which it furnishes. The customer may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company without prior written consent of the Company.

3. Responsibilities of the Customer

- a. The customer is responsible for installing and testing his premises equipment or facilities to insure that when they are connected to DiSi-1 service such equipment or facilities are operating properly.
- b. The operating characteristics of the customer premises equipment or facilities shall be such as to not interfere with any of the services offered by the Company. Such use is subject to the further provisions that the equipment provided by a customer does not: endanger the safety of Company employees or the public; damage, require change in or alteration of the equipment or facilities; impair the operation of the Company's facilities or otherwise injure the public in its use of the Company's services. Upon notice that the equipment provided by a customer is causing or is likely to cause such a hazard or interference, the customer shall take such steps as shall be necessary to remove or prevent such hazard or interference.
- c. The customer's responsibility shall include cooperative testing with the Company as may be necessary. Where regeneration and/or equalization adjustments or changes may be required to compensate for rearrangements and/or changes in outside plant facilities, the customer will be responsible for all expenses incurred in changes to his premises equipment.

4. Connection of Customer-Provided Terminal Equipment, Customer-Provided Derivation Equipment and Customer-Provided Communications Systems.

- a. The following provisions will apply:
 - (1) Customer-Provided Terminal Equipment and /or Customer-Provided Communications Systems may be connected at the premises of the customer to DiSi-1 service.
 - (2) The customer, by use of its own derivation equipment, may create digital bit streams form a DiSi-1 service and such equipment may be connected for transmission of such bit streams when connected thru a customer-provided CSU/TE.

E. DiSi-1 (Continued)

(T)

2. Regulations (Continued)

(T)

D. Connections (Continued)

4. (Continued)

(3) The undertaking of the Company is to furnish DiSi-1 service as ordered and specified by the customer as specified in d. following.

b. Connections to Other Services Furnished by the Company to the Same Customer.

DiSi-1 service furnished by the Company may be connected by the customer to another service or to other services furnished by the Company as specific preceding. connected services are subject to all rules and regulations governing the provisioning of those services.

c. Connections to other services furnished by the Company to different customers.

The customer may connect at the premises of the customer, another DiSi-1 service or other services furnished by the Company to different customers as specified preceding. Connected services are subject to all rules and regulations governing provisioning of those services.

d. Connection of Channel Service Units.

A Channel Service Unit (CSU) or appropriate Termination Equipment (TE) must be provided by the customer to connect a Company-provided digital facility.

E. Features

1. Clear Channel Capability

a. Clear Channel Capability (CCC) is an arrangement that alters a DS1/1.544 Mbps signal with unconstrained information bits, to meet pulse density requirements outlined in Technical Reference 73525. This will allow a customer to transport an all zero octet over a DiSi-1 service channel providing an available combined maximum 1.536 Mbps data rate. this arrangement requires the customer signal at the channel interface to conform to Bipolar with 8 Zero Substitution (B8ZS) line code as described in Technical Reference 73525.

(T)

2. Regulations (Continued)

(T)

E. Features (Continued)

1. Clear Channel Capability (Continued)

b. CCC is provided on DiSi-1 service channels between two customer designated premises, from a customer premises to their Serving Wire Center or Node Central Office and/or to a remote Serving Wire Center or Node Central Office, and from a Central Office to a Central Office, and is subject to the availability of facilities. This optional feature may be ordered at the same time the DiSi-1 service channel is ordered, or it may be ordered as an additional feature of an existing DiSi-1 service channel.

c. When providing CCC via a DS3/44.736 Mbps High Capacity channel, that DS3 channel must be designated, in Company records, as having Clear Channel Capability prior to the provisioning of a DS1/1.544 Mbps High Capacity channel with CCC. Customers must agree to out-of-service periods required to add this feature to an existing DiSi-1 service channel to be optioned for B8ZS.

F. Payment Arrangements and Credit Allowance

1. The minimum period for which DiSi-1 service is furnished and for which charges are applicable is **one** month.

2. Suspension of service is not allowed.

3. Rates (This service is grandfathered, see next sheet)

(T)

A. A Digital Local Channel is furnished between a Serving Wire Center and the customer's premises. or between two customer premises.

	Nonrecurring	Month to Month	36 Month Rate
Each Electronic Leg	\$200.00	\$ 55.00	\$ 51.00

A Wire Charge and associated nonrecurring charges are also applicable equal to the monthly Key Trunk Rate for the wire facilities.

Examples of rate applications (not meant to be all inclusive)

Customer Location, through Central Office, to second Customer Location
