(T)

2.9 **LINE HUNTING**

A. General

Line Hunting provides customers with more than one line the ability to have incoming calls automatically directed to the next vacant line. The Line Hunting selection process starts at a particular line or directory number and continues in a fixed sequence, until an idle line is found or arrives at the end of the sequence. The service is available with Residential and Business one-party rates.

B. <u>Rates and Charges</u>	<u>Monthly Rate</u>	Non-Recurring <u>Charge</u>
Per Line	\$3.00	(1)

(1) Service Connection Charges do not apply when ordered with initial service installation. When ordered separate from initial installation, Service Connection Charges, as found in Section 5, apply.

MISCELLANEOUS SERVICES

8.17 **COMBINATION OF MAIN TELEPHONE SERVICES**

(T)

- A. Two or more main telephone services, when located within the same Central Office Area, may be combined on the same line in such a way that the ringing signal for each of the access lines may be recognized and answered at any of the lines.
- B. Combination of main telephone services is not in accord with the general plan of furnishing telephone service and is provided only under special conditions when warranted by the circumstances involved and when suitable facilities are available. A special construction charge will be applied for such equipment as may be required at any time.
- C. For mileage charges applicable to points outside the base rate area, see Section 8.

8.18 **PUBLIC EMERGENCY ALERTING SYSTEM**

(T)

A. General

The regulations specified herein are in addition to applicable regulations contained in other sections of this tariff.

- 1. This service is an arrangement to provide alert calling, on a manual basis, to a single group of predetermined telephone lines. Communication is provided on a two-way basis between the calling telephone and the called telephones and between called telephones during an alert.
- 2. Alerting Systems may be provided as a private line telephone system, and one-party main telephone exchange service. Only one of the above listed types of service may be provided within each system. When provided on a private line service basis, it is not intended that the private line service be used for any other purpose except group alerting.
- 3. This service is provided subject to the availability of suitable facilities and is offered on the basis that all telephones of a system are located within the same exchange. Interoffice or interexchange facilities may not be compatible with these arrangements and any commitment to associate these channels with a system is subject to transmission limitations.
- 4. Liability in case of failure of service shall be governed by applicable General Regulations, Section 1. The Company shall not be liable, in any event not effectually go governed, for failure of service not resulting from its own gross neglect, nor, in any event, for any indirect consequence of a failure of service, in view of the furnishing of the service at the filed rates.
