**SCHEDULE 22
CUSTOM CALLING SERVICES**

APPROVED

A. General

Custom Calling Services are optional services offered in addition to regular exchange service to those customers served by central offices arranged to provide such services. The number of Custom Calling Services available depends upon the exchange central office providing the service and is subject to the availability of its facilities.

B. Service Descriptions

1. Call Forwarding

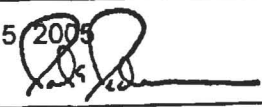

This service redirects incoming calls to another telephone number. The customer can activate this service by dialing a code and entering the number to which calls should be forwarded. When activated, all calls that are forwarded when the line is idle cause a short ring on the forwarded line as a reminder that the service is active. To deactivate Call Forward, a customer must dial a special access code. All calls forwarded are subject to transmission limitations and all applicable local and long distance charges.

2. Call Forward-Busy (Programmed by Telco)

This service automatically redirects incoming calls to a predesignated telephone number or voice mail service when the customer's line is busy. The customer activates the service by contacting the telephone company and designating the number to which all calls will be forwarded when the line is busy. The telephone company then establishes the fixed forward-to telephone number within the switch. To cancel the service or change the forward-to telephone number, the customer must contact the telephone company. All call forwarded with this service are subject to transmission limitations and all applicable local and long distance charges.

B. Service Descriptions (Continued)

3. Call Forward-Busy (Customer Programmable)

This service routes incoming calls to another telephone number when the customer's dedicated number is busy. The customer can activate this service by dialing a code and entering the number to which calls should be forwarded. To deactivate Call Forward - Busy, a customer must dial a special access code. All calls forwarded with this service are subject to transmission limitations and all applicable local and long distance charges.

4. Call Forward-No Answer (Programmed by Telco)

This service automatically redirects incoming calls to another telephone number or voice mail service when the customer's telephone is not answered in a pre-determined number of rings. The number of rings is determined and set by the Company unless otherwise specified by the customer. The customer activates the service by contacting the telephone company and designating the number to which all calls will be forwarded when the telephone is not answered within an established period of time. The telephone company then establishes the fixed forward-to telephone number within the switch. To cancel the service or change the forward-to telephone number, the customer must contact the telephone company. All calls forwarded with this service are subject to transmission limitations and all applicable local and long distance charges.

B. Service Descriptions (Continued)

5. Call Forward-No Answer (Customer Programmable)

This service redirects incoming calls not answered after a predetermined number of rings to another telephone number. The number of rings is determined and set by the Company unless otherwise specified by the customer. The customer can activate this service by dialing a code and entering the number to which calls should be forwarded. To deactivate Call Forward-No Answer, a customer must dial a special access code. All calls forwarded are subject to transmission limitations and all applicable local and long distance charges.

6. Call Forwarding-Remote Access

This service is an additive to the Call Forwarding service and allows the customer to activate and deactivate Call Forwarding from a telephone in another location. All calls forwarded are subject to transmission limitations and all applicable local and long distance charges.

7.

(D)
|
(D)

8. Call Waiting/Cancel Call Waiting

This service alerts a customer who is on the phone that another local or long distance caller wants to get through the line. The customer will receive a tone signal to indicate another incoming call and the caller will receive the usual ringing tone. To place the first call on hold and answer the incoming call, the customer depresses the switchhook once. The customer can then toggle between both calls by depressing the switchhook. If the customer hangs up when a call is still on hold, the customer's line will automatically ring back.

Cancel Call Waiting allows a Call Waiting customer to deactivate the Call Waiting service by dialing a code. When this service is activated, the customer will not be interrupted by the Call Waiting tone and the incoming caller will receive a busy signal. Call Waiting will remain disabled for the rest of the call, but will be automatically restored upon call termination.

B. Service Descriptions (Continued)

9. Call Hold

This service allows a customer to place a current caller on hold, which frees the line so the customer can initiate another call. To activate Call Hold, the customer depresses the switchhook to receive a dial tone and then dials a specific code. Only one call per access line can be placed on hold at a time. The held call cannot be added to another call; however, the customer can toggle between each call.

(N)

(N)

10. Toll Restriction

This service enables customers to restrict all or a combination of 0+ and 1+ toll calls from being placed over their exchange lines/trunks. When a restricted call is attempted from a line/trunk equipped with this service, a dial tone or Company recorded announcement will be heard by the caller.

(T) (M)

11. Home Intercom-Enhanced

This service allows customers to establish a talking path between two or more of their extensions. To activate this service, the customer dials one of the access code numbers predetermined by the Company, receives an announcement, and then hangs up the phone. The phone will ring back in one of the distinctive patterns, depending on the access code dialed. Also included in this package is dialable hold, where one extension can transfer an outside call to another extension.

(N)

12. 6-Way Calling

This service allows a customer to call up to five parties and establish a six-way conference call. To activate this service, the customer dials an access code, dials the desired telephone number (calling party must answer), depresses the switchhook to add the calling party to the line, then depresses the switchhook again to receive a new dial tone. If the called party line is busy or there is no answer, the customer must dial a special access code to drop the line. This process needs to be repeated until all parties (up to five) have been connected to the customer's line. All 6-Way Calls are subject to transmission limitations and all applicable local and long distance charges.

B. Service Descriptions (Continued)

- 13. Speed Call 8 (T)
This service allows the customer to keep a list of eight specified telephone numbers which can be dialed by using a one-digit (2 through 9) access code.
- 14. Speed Call 32 (T)
This service allows the customer to keep a list of 32 specified telephone numbers which can be dialed by using a two-digit (20 through 49) access code.
- 15. Personal Ringing (T)
This service allows the customer to have up to four distinct telephone numbers on a single line. The second, third and fourth numbers will each have a distinctive ringing pattern so the customer can identify which number has been called. If a customer also subscribes to Call Waiting, each phone number will have a distinctive Call Waiting tone. If a customer also subscribes to Call Forward, the main directory number or all four telephone numbers can be forwarded. (C)

B. Service Descriptions (Continued)

16. 3-Way Calling

(T)

This service allows a customer to add a third party to an existing telephone call. To add a third party, the customer depresses the switchhook once to place the current party on hold, receives a dial tone, dials the third party's number, and then depresses the switchhook again to establish the three-way connection. All 3-way calls are subject to transmission limitations and all applicable local and long distance charges.

(D)

(D)

17. Call Transfer Enhanced

(T)

This feature enables a customer to transfer multiple incoming or outbound calls to a third party with either a Screened Transfer or a Blind Transfer. A Screened Transfer enables the transferring party to announce a call to the third party prior to completing the transfer. If the third party chooses not to take the call, the transferring party may disconnect the third party and return to the caller. Otherwise, the transferring party may disconnect, completing the transfer and returning the line to an idle state. A Blind Transfer enables the transferring party to immediately disconnect after dialing the third party, prior to the third party answering the call. After disconnecting, the transferring party may either originate or receive a new call, even though the transferred call is still in progress. In addition, this feature enables a customer to establish a 3-way conference call while enabling any party (including the originator of the call) to drop out of the conference while leaving the other two parties connected. The customer is responsible for all applicable long distance charges for originating or terminating calls that will apply for the duration of the call, even if the customer drops off the call.

B. Service Descriptions (Continued)

15. Home Intercom-Basic

This service allows customers to redial their own directory number in order to talk to another party at a different extension. To activate this service, customers redial their own directory number and then hang-up. After a short interval, the phone will ring back. Once both parties pick-up the phone, they will be able to have a two-way conversation. This service is also known as Revertive Ringing.

16. Toll Restriction with PIN override

This service enables customers to restrict all or a combination of 0+ and 1+ toll calls from being placed over their exchange lines/trunks. In addition, the customer will have the ability to override the restriction on a per call basis by using a Personal Identification Number (PIN). To activate the override, the customer dials a code, the PIN, waits for a dial tone and then dials the toll number. When a restricted call is attempted without the PIN, from a line/trunk equipped with this service, a dial tone or Company recorded announcement will be heard by the caller.

C. Conditions

- 1 The Personal Ringing Service shall be installed without a nonrecurring charge (Schedule No. 3), and the monthly charge in this Schedule shall be waived for students in the LaCenter School District who are certified by their school principal as having fulfilled the requirements of the Attitudes for Success Program, and whose parents or guardians given written permission. Once a student is no longer eligible for the Attitudes for Success Program or, if that program is cancelled, the regular monthly charge shall be applied beginning with the month following lapse of eligibility or cancellation of the program; provided that the service may be cancelled within fifteen (15) working days of lapse of eligibility or cancellation of the program without a nonrecurring or recurring charge assessed to the customer.
2. Any customer using a measured service type of line, including measured EAS service, will incur a usage charge on any call using any type of Call Forwarding.
